

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million (19.5% of the population).

There is a growing awareness of the need to address the needs of the ageing population, and the following sections describe the current research in this area.

2.1. The ageing population

The ageing population is a global phenomenon, and the number of people aged 65 and over is increasing in all developed countries.

In the UK, the number of people aged 65 and over has increased from 10.5 million in 1990 to 13.5 million in 2000 (19.5% of the population).

The ageing population is a global phenomenon, and the number of people aged 65 and over is increasing in all developed countries.
