

Ancient DNA Analysis of Deer Remains from Curaçao

Alpha Hui | Department of Archaeology

Supervisory Team: Dongya Yang, Christine Conlan, and Grace (Hua) Zhang

Background Information

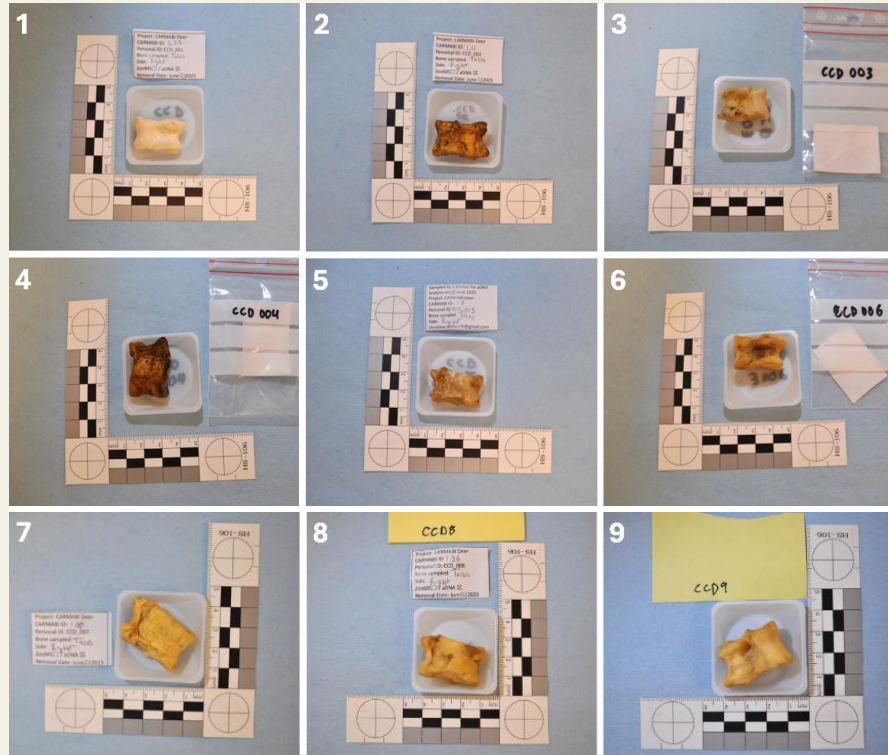

Randy Hollander, *Curaçao White-tailed Deer*, CARMABI Foundation.

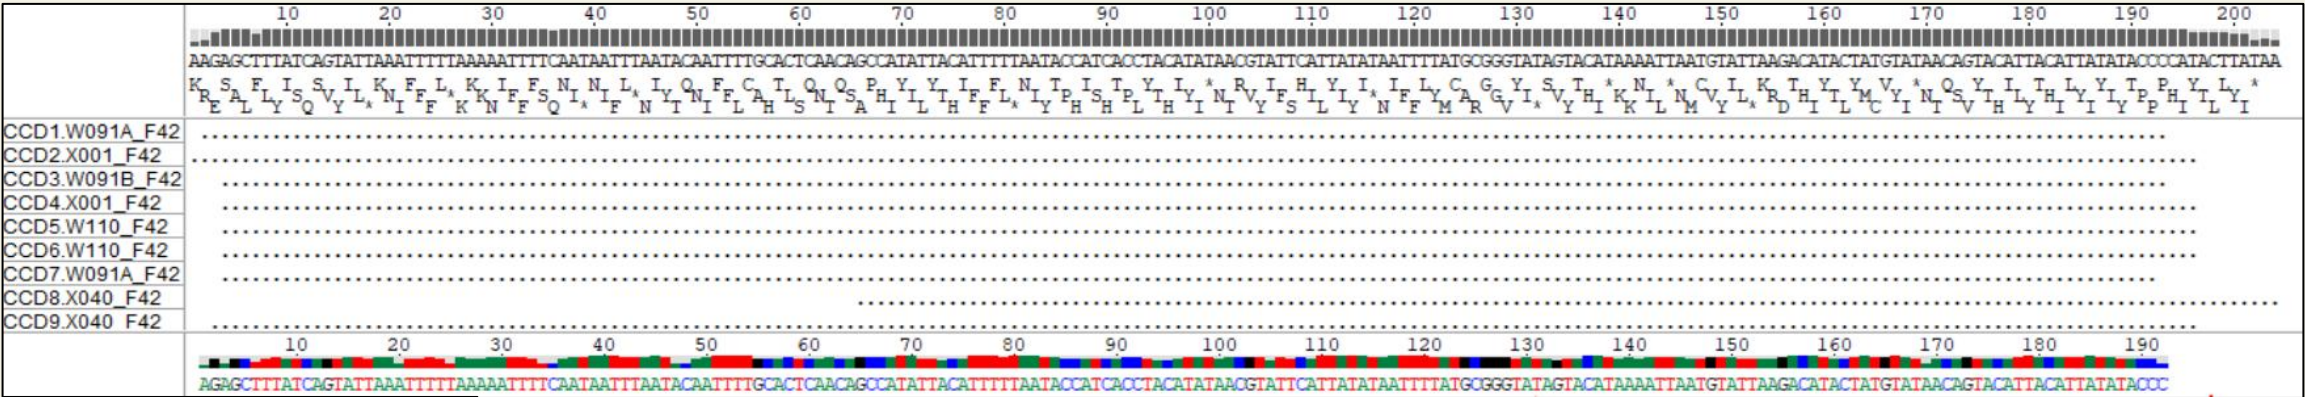

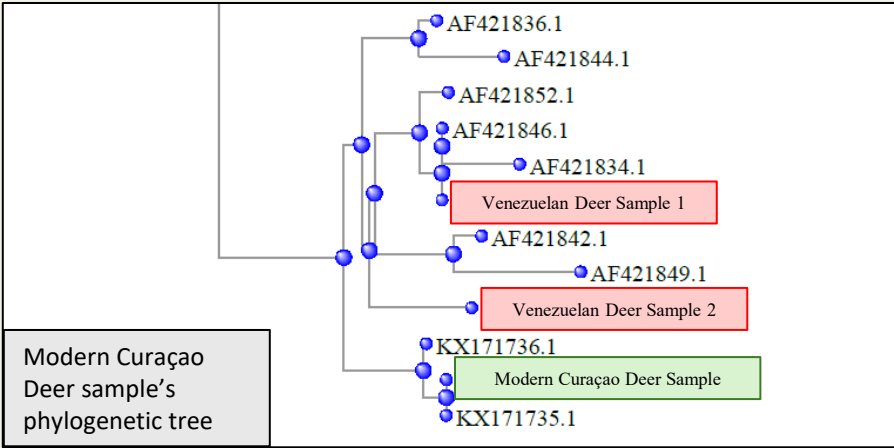

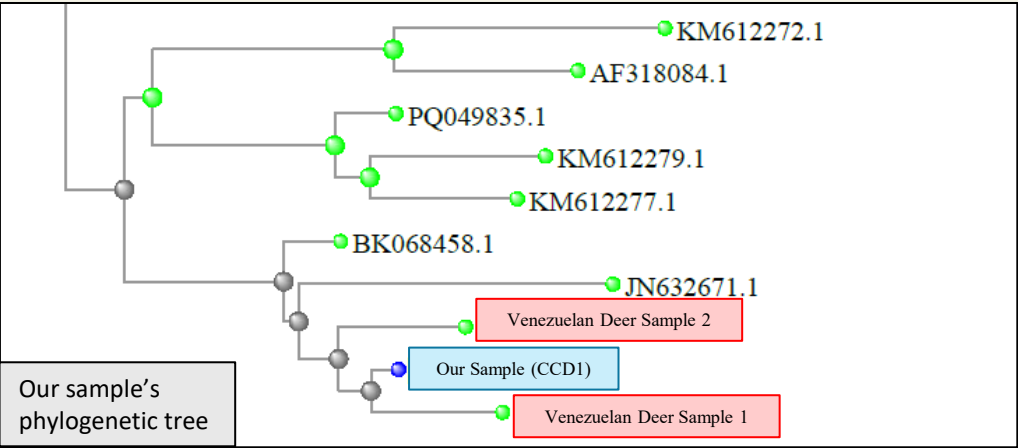

Kaelin M. Groom, *Map of Curaçao*, Springer.

Methods

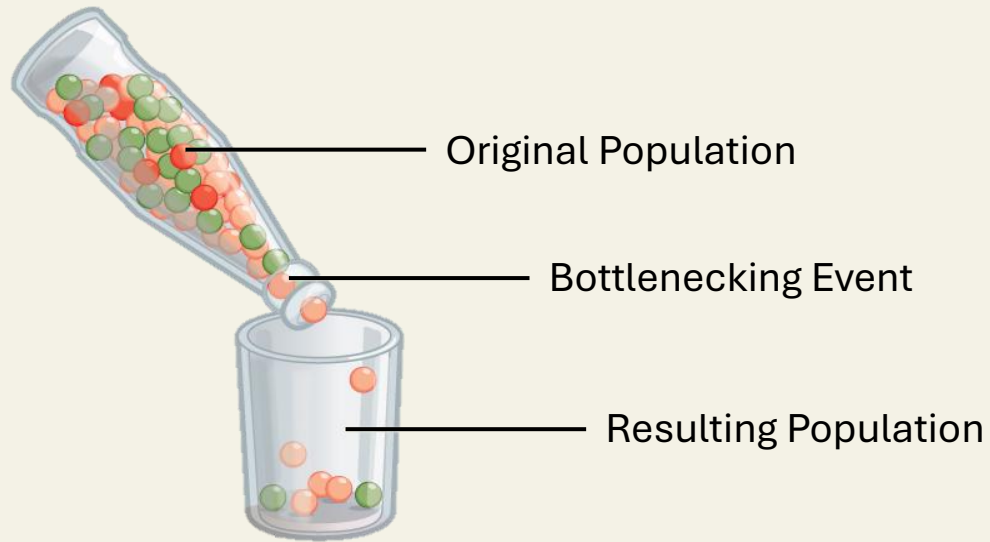

Results

Identical sequences across all 9 samples

Discussion and Conclusion

Future Work

- Expand to include more mtDNA fragments
- More samples: archaeological, historical, and modern

Implications

- Monitor population changes of Curaçao deer populations through time
- Inform future conservation efforts

Acknowledgements

Thank you to Dr. Dongya Yang, Christine Conlan, and Dr. Grace (Hua) Zhang for their continued support on this study. Additional thanks to Christina Giovas and CARMABI for providing the sample materials.
